

# Mini-Simposio SIF

Venerdì 3 novembre 2023 ore 16,00

[urly.it/3xzpx](http://urly.it/3xzpx)

***“Microglia and Astrocytes crosstalk with neurons in physiological and pathological conditions”***

**Organizers:** Stefano Garofalo (University “Sapienza” of Rome) and Eleonora Vannini (Institute of Neuroscience - CNR of Pisa)

**16.00 Prof. Marie-Eve Tremblay (CRC Neurobiology of Aging and Cognition, University of Victoria Canada)**

*"Influences of the lifestyle on microglia-synapse interactions: a focus on metabolism and the ketogenic diet"*

**16.30 Prof. Paola Bezzi (Unil, Losanna, Svizzera; Sapienza University of Rome, Dept. of Physiology and Pharmacology)**

*"Disruption of Astrocyte-Dependent Dopamine Control in the Developing Medial Prefrontal Cortex Leads to Excessive Grooming in Mice"*

**17.00 Prof. Laura Civiero (University of Padova, Dept. of Biology)**

*"Atypical chemokine receptor 3: a novel player in astrocyte-mediated elimination of synaptic terminals"*

**17.30 Dr. Valentina Cerrato (Neuroscience Institute Cavalieri Ottolenghi, University of Turin, Italy)**

*"Unveiling the diversity of cerebellar astrocytes: insights into their molecular identities, development and functions in relation to cerebellar neuronal circuitries"*
